

Green Lakes Climbers Trail up South Sister

Tuesday, September 01, 2009
1:27 PM

This trail will take you from Green Lakes up South Sister. This trail is not maintained. You will find it less crowded than the main trail at Devils Lake but a little more challenging.

The trail will ascend to the right of the glacial stream (s) and continue uphill until it peters out at the top of the bluff. You want to make sure you cross over and pick up the trail on the left side of the glacier stream to avoid having to cross the steeper section farther up on the right. DO NOT attempt to cross the glacier unless you have experience and the proper equipment or you may end up like this [guy](#) or worse. Once you're on the trail to the left of the Glacier stream the trail is marked with cairns and will take you up to cinder scree.
